Education

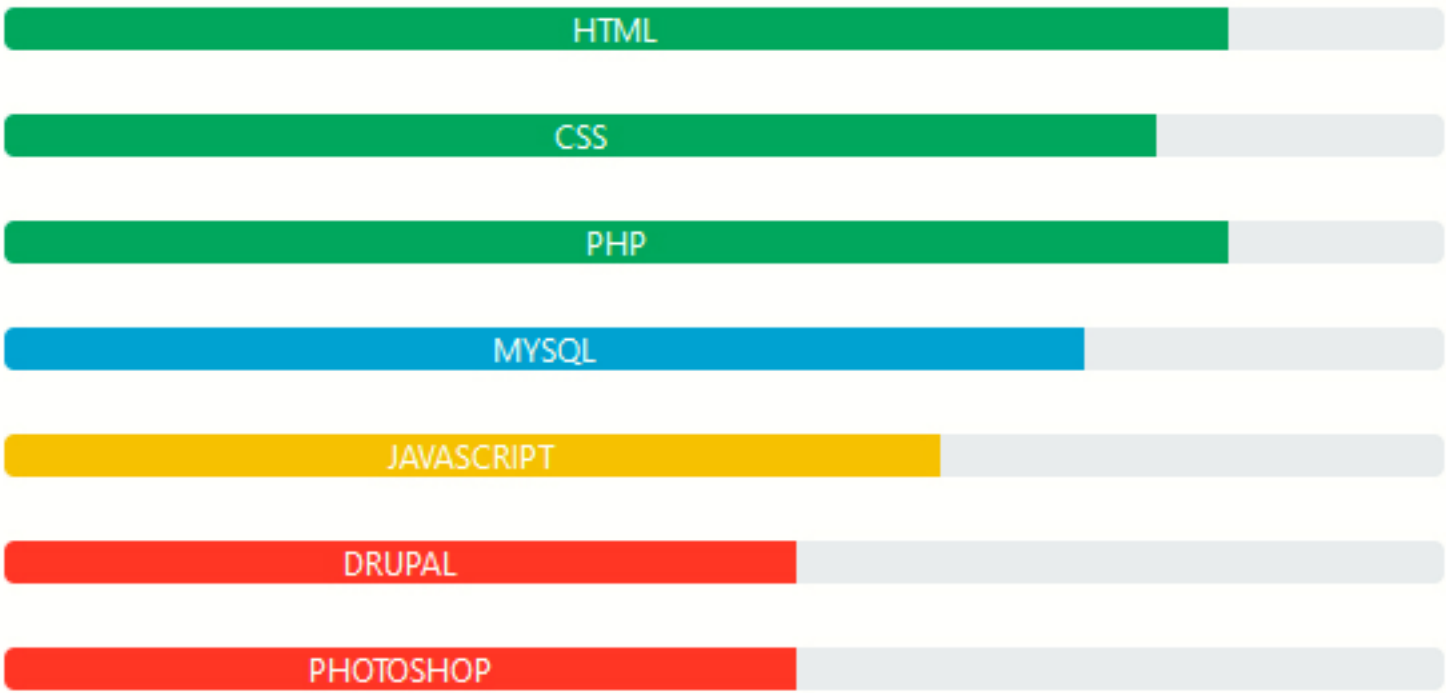

Self-Taught Web Developer

Jan 2016 - Present

Autodidact

I learned how to code using basic knowledge plus extensive Google searching. W3 Schools, Stack Overflow and many other sites contributed to my education and continue to do so today. I started with a heavy emphasis on database driven applications using PHP and MySQL then added Javascript and more fun with CSS. I am starting to delve into some frameworks now such as REACT. I am always looking to learn more and expand my capabilities so this education will never end.

Skill Set

Work Experience

Geiger-Tech

Jan 2019 - Present

Web Developer

Create online database driven applications as well as static custom websites for various clients.

- Responsive web design
- Create from scratch using code editor such as VS Code.
- Develop from Drupal design template.

Tri State Digital Services

Oct 2010 - Jan 2022

Software Engineer/DO

Created and developed custom field service management software for service technicians across the country. Software tracks time, miles, expenses, service notes, part ordering and tracking, service scheduling, dispatching and alerts plus statistical data reports and charts. DO responsibilities include technician training development and oversight, quality of service management and coordination of all field service operations.

- Created Field Service Management Application
 - PHP
 - MySQL
 - Javascript
 - Google Maps API
 - Includes Client Portal
- Technician Training Development.
 - Moodle
 - Teams Webinar
 - Write documentation
- Field Service Management.
- 100% remote - work from home.
 - VPN
 - Teams
 - AnyDesk, Team Viewer, LogMeIn
